

Meet Carlos and Suyapa!

Habitat for Humanity of Montgomery County (Habitat MCTX) joyfully welcomes Carlos, Suyapa and their family to their new home in Cedar Creek. The family has been renting their home for 16 years and the majority of their income goes toward covering housing costs.

With the support of the John Cooper School and First America Homes, Carlos and Suyapa witnessed the transformation of a pile of wood into a home for their family, filling them with anticipation and excitement.

The couple is fulfilling a dream never imagined and they are going to continue to be resilient and seek the best opportunities for their children. Suyapa shared that "having a home built in this community is going to provide financial relief for us. We won't have to worry about stretching our fixed income as we grow older, and we can leave behind this house for our daughters.
