

Welcome Home, Venessa!

Venessa had been working as a live-in caretaker for years. This meant storing her own belongings and living in other people's homes, surrounded by their belongings. While this was a fulfilling role, she began to long for a place to call her own. That was when she decided to enroll in the Habitat for Humanity of Montgomery County, Texas, Homeownership Program. Her hopes for a place to truly call home led her to enroll in the Habitat for Humanity of Montgomery County, Texas, Homeownership Program.

The journey has been challenging, but Venessa's determination has never wavered. Thanks to the support of the Habitat MCTX staff, dedicated volunteers, and her tireless efforts, she can now see the light at the end of the tunnel. In just a few weeks, Venessa will proudly become a homeowner.

The program required Venessa to earn her down payment through hard work, actively participating in the construction of her own house and those of her neighbors, and volunteering at the Habitat MCTX ReStore. This hands-on experience has filled her with a profound sense of pride and accomplishment.

Venessa often dreams of the day she can finally enjoy her space with all her cherished belongings out of storage. She envisions a yard, a sanctuary where she won't need to borrow anything. Most of all, she eagerly anticipates the joy of her granddaughters visiting and having plenty of room to play.

The future looks incredibly bright for Venessa. The knowledge that she will soon have a stable and permanent home lifts a tremendous weight off her shoulders. No longer will she have to worry about moving from place to place. She is on the path to a secure and happy life, filled with the promise of new beginnings and the comfort of a home to call her own.
