

Welcome home, Sharnice and Roderick!

Sharnice and Roderick started on a journey with Habitat for Humanity of Montgomery County, Texas's Homeownership Program, driven by their longing for stability. Tired of the constant shuffle from one apartment to another, they hoped for a place they could call their own.

The family's current living situation is challenging and is filled with harsh conditions, putting their health and safety at risk. Bugs have infiltrated their home, and mold has crept into the corners. Electrical outages during storms added to their woes, and finding parking upon returning late only added to their stress. Despite these challenges, Sharnice and Roderick find hope. They have diligently poured themselves into Habitat MCTX's program, completing sweat equity hours. The anticipation of moving into the Cedar Creek neighborhood fills the family with excitement, knowing they have a hand building their future and forging connections with their new community.

Most importantly, they envisioned a haven for their children. The thought of decorating their own rooms filled the kids with pure joy, and the promise of safe, spacious yards for play brought immense relief to Sharnice and Roderick's hearts. They eagerly anticipate the family time they will cherish in their new living room. They are planning countless game and movie nights.

With this newfound stability, their future shines with possibilities. Liberated from the constraints of living paycheck to paycheck, they could dream of saving for their children's education and indulging in well-deserved vacations. A future where relaxation is not a luxury but a reality pushes them forward.
