

Welcome home, Ana!

Ana turned to Habitat for Humanity of Montgomery County, Texas (Habitat MCTX), when a traditional mortgage was not an option. The Habitat MCTX Homeowner Services team not only guided Ana through the application process but also equipped her with the necessary tools to qualify for the Homeownership Program. This life-changing support from Habitat MCTX has inspired Ana to pursue her dream of homeownership.

After attending credit workshops and financial coaching provided by Habitat MCTX, Ana achieved a level of security she never thought possible. Ana's family's living situation is currently cramped and lacking privacy, with her 18-year-old daughter, Mariana, sharing a room with her grandmother and her 9-year-old son, Kayden, sharing a room with Ana.

The Habitat MCTX building process, with its demand for sweat equity, was a challenging path that Ana willingly embarked on for the homeownership opportunity. Traditional avenues, like banks, were inaccessible to her family, making owning a home a distant dream. "Thanks to this program, I can offer my children a place to call home," shared Ana. "Mariana has matured significantly through her contributions to our sweat equity hours." "Seeing volunteers show up daily at the build site fills me with gratitude and motivation, knowing they're dedicating their time to families like ours." This journey of resilience and determination is truly admirable.

Moving into their own home fills Ana with pride and joy. Knowing they will soon have their own space, especially a kitchen, is something she eagerly looks forward to. Mariana and Kayden are thrilled about having their own rooms for the first time.

"Our future looks brighter with a safe, decent, affordable home secured." Ana would have continued to face stress and financial strain without this accomplishment. "While I wouldn't have given up hope, achieving homeownership would have been a much longer and more expensive journey." Habitat MCTX is very proud of this incredible family, and we are excited to welcome them home to Cedar Creek!
